

# Product Portfolio Guide

Accelerate Your Software Innovation with Tools to Build, Test, and Monitor Great Software

## Manage

 **Zephyr** - Track test cases, pipeline metrics, and more in a standalone solution or natively inside Jira.

## Design

 **SwaggerHub** - Collaborative platform for API design, documentation, and development using the OpenAPI Specification.

 **HipTest** - Enable continuous testing by collaborating, documenting, and executing BDD test scenarios.

## Create

 **ServiceV Pro** - Create, configure, and deploy virtual APIs, UIs, and other services to ensure availability in the pipeline.

 **Collaborator** - Build quality and trust between developers with peer code and document review.

 **TestLeft** - A UI testing framework for developers to test desktop and web applications in their IDE.

## Test

 **SoapUI Pro** - Create, run, and maintain your automated functional and security tests for REST and SOAP APIs.

 **LoadUI Pro** - Create, run, and analyze performance tests for REST and SOAP web services.

 **TestComplete** - Create, run, and maintain your automated testing for desktop, web, and mobile apps.

 **LoadNinja** - Easily create tests on any web application, then generate load on real browsers at scale.

 **CrossBrowserTesting** - Run manual, visual, or automated Selenium tests against real desktop and mobile browsers.

## Monitor

 **AlertSite** - Global, synthetic performance monitoring inside or outside your firewall for web, mobile, and APIs.

## SmartBear Named a Leader in the 2018 Gartner Magic Quadrant for Software Test Automation\*

1. Gartner Magic Quadrant for Software Test Automation, by Joachim Herschmann, Thomas E. Murphy, Jim Scheibmeir, November 27, 2018.

Gartner does not endorse any vendor, product or service depicted in its research publications, and does not advise technology users to select only those vendors with the highest ratings or other designation. Gartner research publications consist of the opinions of Gartner's research organization and should not be construed as statements of fact. Gartner disclaims all warranties, expressed or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose. This graphic was published by Gartner, Inc. as part of a larger research document and should be evaluated in the context of the entire document. The Gartner document is available upon request from SmartBear.

# Software Development Lifecycle with SmartBear

Agile and DevOps are transforming the way software is delivered in modern organizations, requiring teams to communicate, collaborate, and automate in new ways. SmartBear has tools across the entire software delivery lifecycle to help developers, testers, business owners, and operations teams build and deliver quality applications and services, at the speed your customers expect.

## Manage | Analyze and improve all of your testing

 **Zephyr** Native Jira & enterprise test management

 **HipTest**

Design features & tests using BDD

 **Design**

Collaborate on user stories, tests, and code

 **SwaggerHub**

Design, model & share API definitions

 **Collaborator** Code, Document & Artifact Review

## Review | Reduce defects and improve trust with peer code review

UI

API

 **CrossBrowserTesting**

Run Selenium & Appium tests in the cloud

 **TestComplete**

Automated UI functional testing

 **LoadNinja**

Automated UI performance testing

 **Test**

Create, manage, and execute automated API and UI tests

 **SoapUI Pro**

Automate API functional & security tests

 **LoadUI Pro**

Automate API load & performance tests

 **ServiceV Pro**

Test virtualized APIs to reduce bottlenecks

aws

Deploy to production once tests and builds pass

 **Monitor**

Monitor the performance of your APIs and web applications

 **AlertSite**

Global, synthetic API monitoring

**6.5M+**  
Users

**22K+**  
Companies

**194**  
Countries

Over 6 million software professionals and 22,000 companies across 194 countries use SmartBear tools
