

The Single Source of Truth for API Development

# The Platform for API Design and Documentation With The OpenAPI Specification

#### Secure API Collaboration

SwaggerHub is built for organizations, allowing you to centrally manage your API contracts, documentation, and enable secure collaboration and documentation across multiple teams for faster, more efficient API development.

### **Enforce API Standardization**

SwaggerHub enables faster, standardized API design with an embedded style guide and custom rules that ensure your development stays compliant with the OpenAPI Specification and your organizational standards.

## **Streamline API Integrations**

SwaggerHub unleashes the power of your API definition for improved efficiency and automation across your CI/CD pipeline with streamlined integrations with GitHub, GitLab, Bitbucket, Azure DevOps and more...

# **Supporting Teams Using OAS At Scale**

SwaggerHub has helped us streamline the way that we design and implement APIs... As an architect, I love when good tool support saves me the hassle of enforcing complex policies!

- Henrik Thomsen, IT Architect, FOSS Analytical

SwaggerHub acts as a centralized host for collaboration among all moving parts and makes the process very efficient, intuitive, and seamless.

- Scot Hasting, CIO, Bonotel

## Integrations

Innovators Who Trust SwaggerHub

# Software Development Lifecycle with SmartBear

Agile and DevOps have transformed the rate of software development. To keep up, teams must work and communicate in new ways -- which is where SmartBear comes in. Our tools help streamline your process, so you can release software at the speed your customers expect.

**Manage** Analyze and improve all of your testing

**Zephyr** Native Jira & enterprise test management

CucumberStudio

Design features & tests using BDD

Design

Collaborate on user stories, tests, and code

SwaggerHub

Design, model & share API definitions

Commit

Commit and push new code and tests to kick off CI/CD

API

UI

Collaborator Code, document & artifact review

CrossBrowserTesting

Run Selenium & Appium tests in the cloud

Automated UI functional testing

Automated UI performance testing

Test mobile apps on real devices in the cloud

Test

Create, manage, and execute automated API and UI tests

Automate API functional & security tests

Accelerate & manage API functional testing

Automate API load & performance tests

Test virtualized APIs to reduce bottlenecks

aws

Deploy

Deploy to production once tests and builds pass

Monitor

Monitor the performance of your APIs and web applications

Global, synthetic API monitoring

**Review** | Reduce defects and improve trust with peer code review
