# ImmuniWeb®
AI for Application Security

We Simplify, Accelerate and Reduce Costs of Application Security Testing, Protection and Compliance

Gartner.

ImmuniWeb disrupts traditional application security testing by delivering web and mobile application testing augmented with proprietary machine-learning technology and human testing

IDC

ImmuniWeb has woven together machine learning with its own expert testers to confidently offer unique zero false-positive SLA

How ImmuniWeb® AI Platform Works

ImmuniWeb® AI Platform illuminates your external attack surface and Dark Web exposure for well-informed, risk-based and DevSecOps-enabled application penetration testing.

1. Illuminate Your Attack Surface to Prioritize Testing

ImmuniWeb® Discovery
Dark Web & Attack Surface Monitoring

AI-Enabled | Automated | 24/7

2. Run Risk-Based Security Testing and Remediation

ImmuniWeb® On-Demand
Web Application Penetration Testing

AI-Enabled | Manual | One-Time

ImmuniWeb® MobileSuite
Mobile Penetration Testing

AI-Enabled | Manual | One-Time

3. Ensure Continuous Security Monitoring

ImmuniWeb® Continuous
Continuous Penetration Testing

AI-Enabled | Manual | 24/7

Visibility. Security. Compliance.

Traditional Application Penetration Testing and Web Vulnerability Scanning

Incomplete visibility of your digital assets ❌

Trivial scanning or costly manual labor ❌

Incomplete or redundant testing ❌
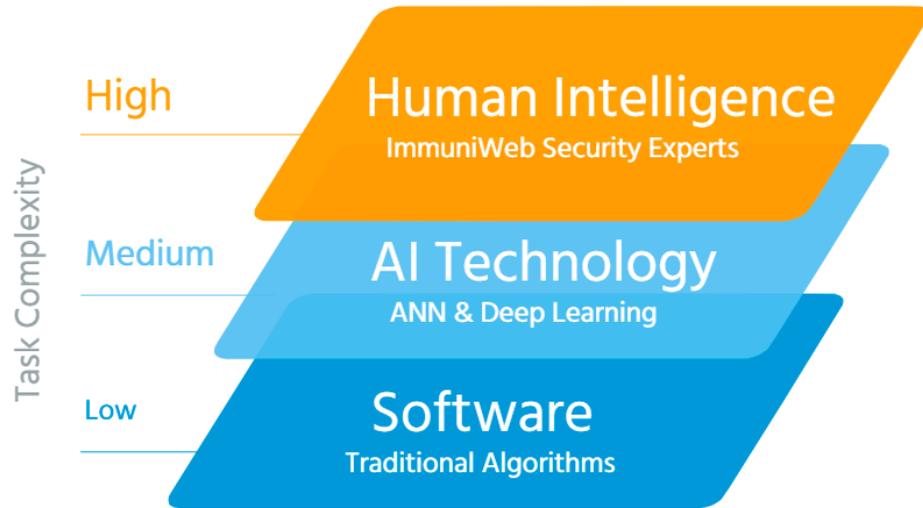

False positives and noise ❌

Protracted remediation ❌

VS

ImmuniWeb®
AI for Application Security

✔ Holistic visibility of assets, risks and threats

✔ AI intensifies and accelerates human testing

✔ Risk-based and compliance-driven testing

✔ Moneyback for a single false positive

✔ DevSecOps & CI/CD integration

AI for Intelligent Automation and Acceleration

Task Complexity

High — **Human Intelligence** ImmuniWeb Security Experts

Medium — **AI Technology** ANN & Deep Learning

Low — **Software** Traditional Algorithms

ImmuniWeb leverages our award-winning **AI technology for intelligent automation and acceleration** of laborious tasks and processes, saving as much as 90% of human time compared to traditional human services.

Our security experts handle only to the most complicated tasks and processes that truly deserve human intelligence thereby offering **the best quality and best price of service** on the global market.

Testimonials and Customers References

66

We used ImmuniWeb for some of our products and we have been highly satisfied from the provided service as valid vulnerabilities with no false positives were identified. The report ImmuniWeb delivered to us was quite clear in terms of the classifications and the description of the identified vulnerabilities, linking to the corresponding CVE and the fix recommendations. We recommend ImmuniWeb to other vendors to make their web products secure

We believe ImmuniWeb platform would definitely address the common weaknesses seen in manual assessments. The AI-assisted platform not only automates the assessments, but also, executes them in a continuous, consistent and reliable fashion. Admittedly, the platform would definitely add quick wins and great ROI to its customers on their investment.
