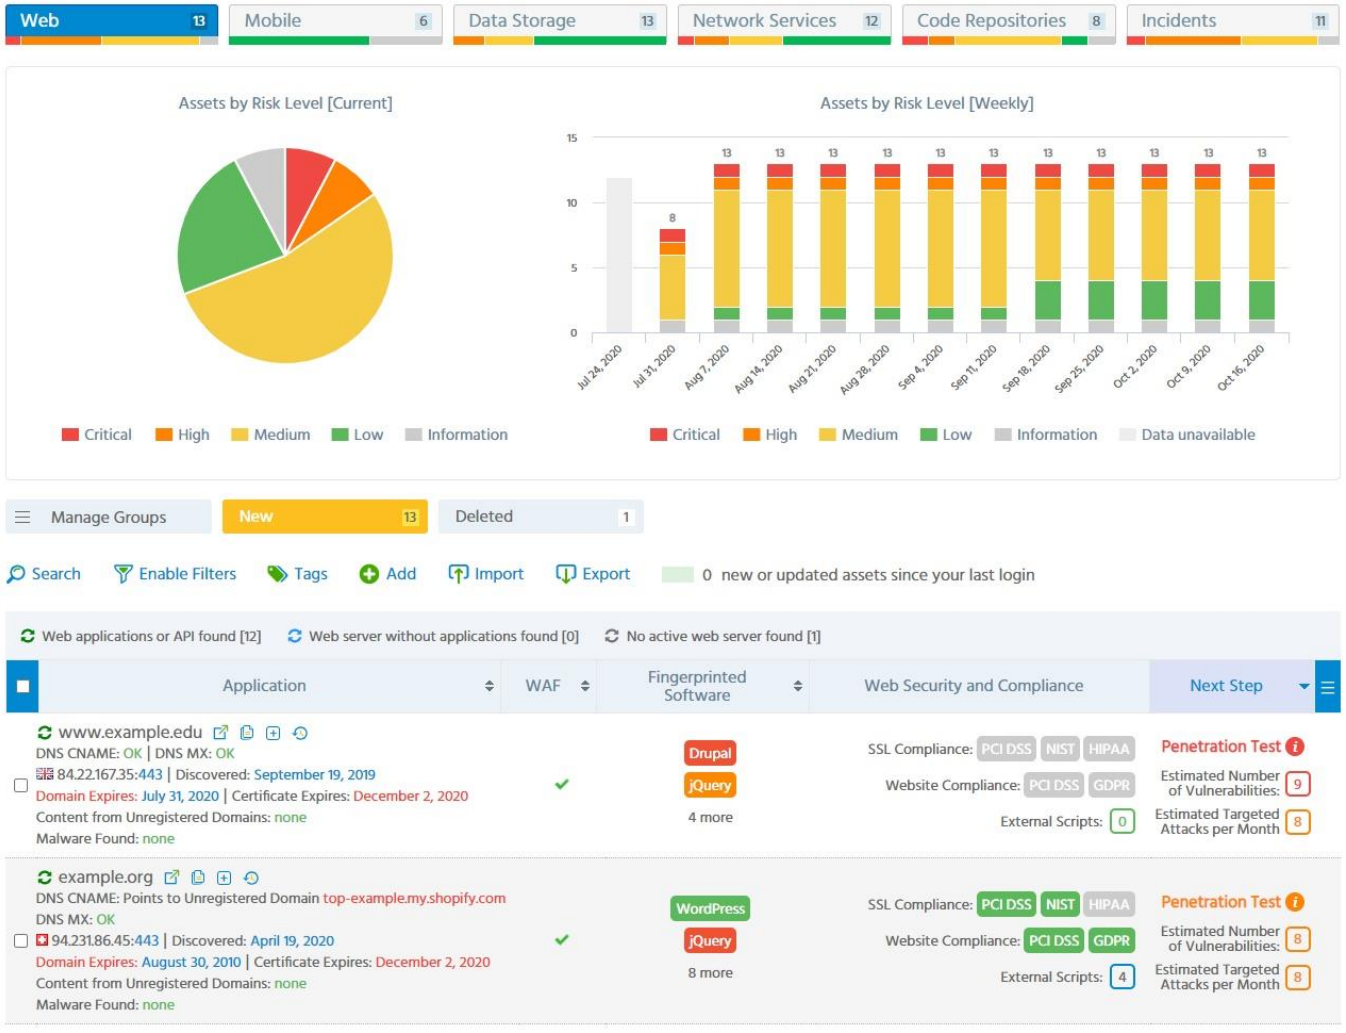
Everything Visible. Everything Secure.



Attack Surface Monitoring Made Easy

1. Enter a company name
2. See what hackers see
3. See what hackers do

What Hackers Know

Compliant with "Legal Considerations when Gathering Online Cyber Threat Intelligence and Purchasing Data from Illicit Sources" guidelines by the U.S. Department of Justice

Code Repositories Monitoring and Beyond

Get Control Over Your Source Code at:

GitHub

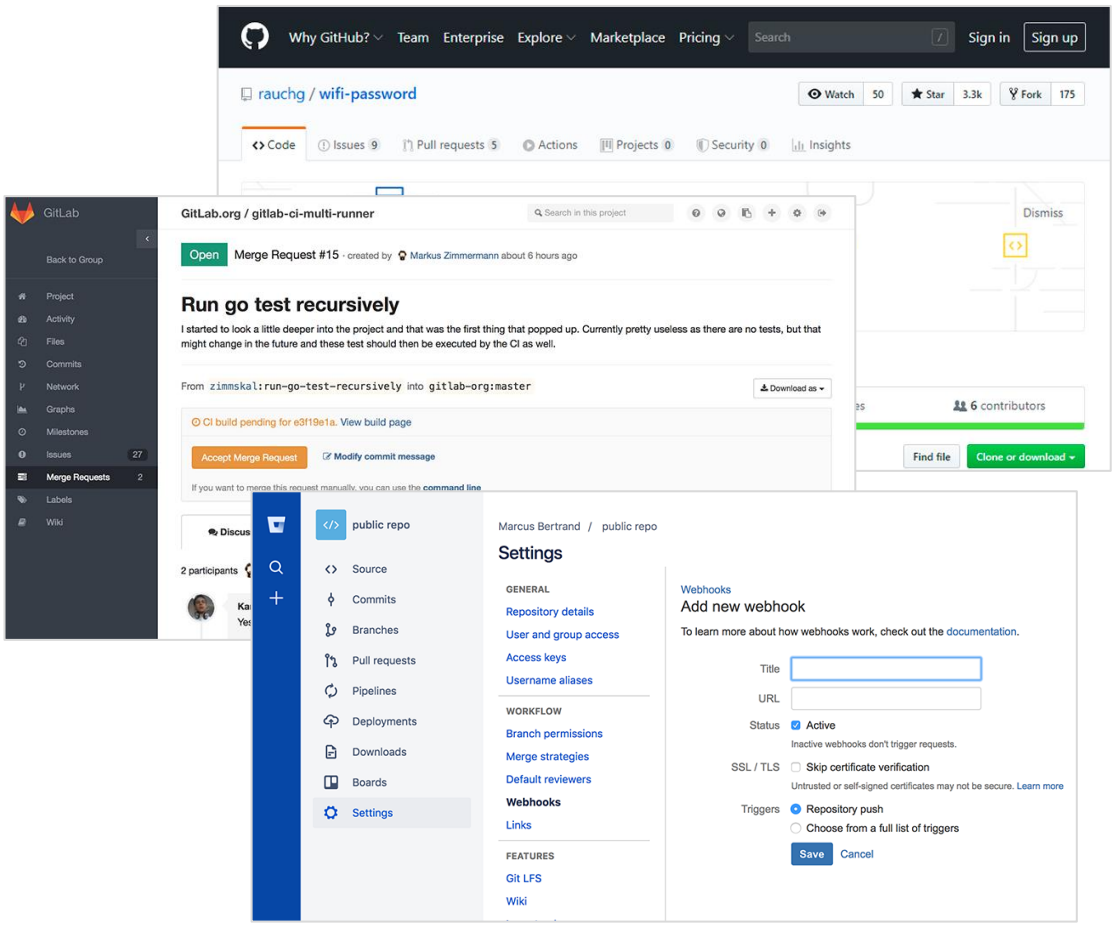
GitLab

PASTEBIN

Bitbucket

Illuminate and Continuously Monitor:

- Accidentally leaked source code
- Malicious source code and exploits
- Copyright infringements



What You Get

Asset Discovery 24/7

- APIs & Web Services
- Web Applications & Websites
- Domains & SSL Certificates
- Critical Network Services
- IoT & Connected Objects
- Public Code Repositories
- SaaS & PaaS Systems
- Public Cloud & CDN
- Mobile Apps
- Databases

Helicopter view of your external attack surface

Security Monitoring 24/7

- Website Security
- WAF & CSP Presence
- SSL Encryption & Hardening
- PCI DSS & GDPR Compliance
- Software Composition Analysis
- Expiring Domains & Certificates
- Malware & Black Lists Presence
- SPF, DMARC & DKIM Presence
- Mobile Application Security
- Cloud & DB Security

Production-safe vulnerability and compliance scanning

Dark Web Monitoring 24/7

- Stolen Credentials
- Pastebin Mentions
- Breached IT Systems
- Exposed Documents
- Leaked Source Code
- Phishing Websites & Pages
- Fake Accounts in Social Networks
- Unsolicited Vulnerability Reports
- Trademark Infringements
- Squatted Domain Names

Proactive and timely reaction to security incidents

What You Get

One-Click Data Export for DevSecOps

Actionable Security Ratings for Each Application

24/7

Estimated Number of Vulnerabilities

The projected number of exploitable security vulnerabilities that are likely present in a web or mobile application. Helps properly prioritize the **penetration testing targets in a risk-based manner**.

Estimated Targeted Attacks per Month

The projected number of targeted attacks (i.e. aiming your organization specifically) per month against a web application. Helps properly **schedule the penetration testing in a threat-aware manner**.

Based on Machine Learning technology trained on proprietary and OSINT Big Data

Successful Use Cases

Simplify Compliance

Meet visibility, inventory & security monitoring requirements

Prevent Data Breaches

Get instant alerts on vulnerable or misconfigured cloud or IT assets

Outpace Cybercriminals

Respond rapidly to new incidents in Deep, Dark and Surface Web

Avoid Redundant Costs

Scope and schedule remediation & patching in a risk-based manner

Reduce Human Risk

Get instant alerts on shadow IT or Internet-exposed test systems

Minimize Third Party Risks

Get a real-world security ratings of your vendors and suppliers

ImmuniWeb® Discovery Packages

Each package includes unlimited number of discoverable assets and security incidents related to your company (excluding subsidiaries with different names).

Corporate Pro

Daily Update

We automatically scan all your assets and search for new ones every day. You can also re-scan any assets manually without limits.

Corporate

Weekly Update

We automatically scan all your assets and search for new ones every week. You can also re-scan any assets manually without limits.

Express Pro

Biweekly Update

We automatically scan all your assets and search for new ones every two weeks. You can also re-scan any assets manually without limits.

1 Enter a Company Name

Non-intrusive OSINT technology for self-assessment or third-party risk management

2 See What Hackers See

You will get your dashboard delivered within the next three business days

3 See What Hackers Do

Add users and personalize instant alerts about new breaches or incidents

Frequently Asked Questions

Q How many companies can I include into one subscription?

A There is no limit for the number of continuously monitored digital assets per company, but each company requires a separate subscription.

Q Do I need a permission to run Discovery on third-parties?

A No, we use only OSINT discovery and non-intrusive security testing methodologies that normally do not require a pre-authorization from the targeted company, differently from penetration testing for example. Therefore, you can use Discovery to scorecard your suppliers or vendors for third-party risk management purposes.

Q Will you discover all my external assets?

A We normally detect 99% of externally exposed IT and digital assets that are attributable to your organization by a wide spectrum of OSINT-based methodologies and network reconnaissance. Moreover, you can always manually add any assets for continuous security and compliance monitoring in just one click.

Testimonials and Customers References

We used ImmuniWeb for some of our products and we have been highly satisfied from the provided service as valid vulnerabilities with no false positives were identified. The report ImmuniWeb delivered to us was quite clear in terms of the classifications and the description of the identified vulnerabilities, linking to the corresponding CVE and the fix recommendations. We recommend ImmuniWeb to other vendors to make their web products secure

ebay

We believe ImmuniWeb platform would definitely address the common weaknesses seen in manual assessments. The AI-assisted platform not only automates the assessments, but also, executes them in a continuous, consistent and reliable fashion. Admittedly, the platform would definitely add quick wins and great ROI to its customers on their investment.

4.8 out of 5

The report was very detailed and clearly explained the risk at executive level, a great assistance in taking the report to senior management. I would have no hesitation in recommending ImmuniWeb.

Celgene

ImmuniWeb is an efficient and very easy-to-use solution that combines automatic and human tests. The results are complete, straightforward and easy to understand. It's an essential tool for the development of the new digital activities
