

# RangeForce Battle Skills

RangeForce offers hundreds of interactive training modules on a variety of cybersecurity topics. With Battle Skills, you'll have access to our full training library, including all available Battle Paths, and all new training modules developed by our team of cybersecurity experts.

Battle Skills is an ideal resource for individuals looking to continuously hone their personal cybersecurity skills. For teams, it serves as an essential tool in the ongoing mission to ensure cyber resilience and security orchestration. It also provides security leaders with key insights regarding a team's strengths and weaknesses. Use Battle Skills to experience advanced security tools in action and stay up-to-date on the latest known threats.

## The RangeForce Platform

RangeForce operates as a cloud-based and on-demand solution. It's accessible via a web browser and is easy to deploy for both individuals and teams. The core of the RangeForce solution is an integrated cyber range. Training modules reflect real-world environments, with real IT infrastructure, real security tools, and real cyberattacks.

## Platform Features:

- Software and network emulation
- Interactive, hands-on training
- Virtual teaching assistant
- Cloud-based and on-demand
- Learner goals and objectives
- Achievement-based badging

## Battle Paths:

- SOC Analyst 1
- SOC Analyst 2
- Threat Hunter
- Web Application Security (OWASP)
- Microsoft Core Security

## Solution-Specific Training:

- Splunk
- QRadar
- Phantom
- Fortinet
- CISCO
- YARA
- Wireshark

# RangeForce Battle Skills

## **Develop and Train Continuously**

Our training platform is home to over 450 modules. We offer training across cybersecurity concentrations, including SOC, DevSecOps, AppSec and more. Modules offer interactive, hands-on exposure to emulated security solutions and the latest known threats. Battle Paths are available for in-depth, role-specific training designed to ensure operational readiness for you and your team.

## **Discover and Assess Talent**

Cultivate talent internally and externally with assessment and training. Evaluate job candidates to better understand their capabilities and fit for your team. Create an internal talent pipeline through cross-training and assessment while simultaneously increasing security expertise throughout the organization.

## **Reduce Training Costs**

Cut costs associated with conventional online and classroom-based cybersecurity training. Facilitate remote and on-demand training to meet your team's specific needs. Eliminate the prohibitive barriers associated with building and maintaining your own cyber range.
