

FORTRA

DATASHEET *(Beyond Security)*

beSOURCE: Secure your code. Prevent breaches. Innovate faster & safer. With cutting-edge static application security testing

In our fast-paced digital world with expectations for real time all the time, the pressure is on to release new apps, features, and enhancements as quickly and as often as possible.

The challenge developers continuously face is ensuring that the code they ship is free of vulnerabilities and protected against the cyberthreats that compromise data security, customer loyalty, and brand reputation.

Being able to overcome this challenge means identifying and eliminating application vulnerabilities as quickly and as early as possible in the software development lifecycle.

This is where beSOURCE comes in.

At the Source of AppSec

beSOURCE is an innovative static application security testing solution that is focused on vulnerability detection. It enables developers to implement non-functional security testing of application source code earlier than ever during the software development life cycle (SDLC), easily integrating security into DevOps across the organization.

The Faster, Smarter, Easier Way to Identify Vulnerabilities

Continuous application testing
for early remediation

Incremental scanning
for accelerating time-to-findings

Compiler-free testing
for simple and painless scan preparation

Standalone scanning
for quick and easy decentralized testing

The beSOURCE Path to AppSec

Scanning
the code without the need for compilation or execution

Identifying
security and quality flaws

Incremental Analysis
for new DevSecOps code released continuously

Delivering
real-time findings for immediate remediation

A Broad Set of Capabilities

Comprehensive & in-depth

scanning capabilities, for both standalone and enterprise

Supporting a broad variety

of programming languages and frameworks

Ongoing real-time reports

of discovered vulnerabilities, project state, and historical trends

Extensive standards coverage

including SANS Top 25, CERT, and OWASP Top 10 and others

Cloud-based, SaaS offering

geared towards on-demand scan requests

Easy & fast

deployment, configuration, and utilization

Take AppSec to the Next Level

beSOURCE enables you to take your application security testing program to the next level with accurate, fast, and ongoing application security testing, so you can easily and effectively:

- ✓ Eliminate vulnerabilities faster and earlier
- ✓ Prevent exploits and breaches
- ✓ Enhance regulatory compliance
- ✓ Secure oversight of security program management Ensure application security awareness across the organization
- ✓ Integrate security and enable DevSecOps from the ground-up
