

## **Mobile Thread Defence (MTD)**

- Solution must have MTD functionality built into secure SDK applications.
- Wrapped applications will have built-in MTD protection without any agent.
- MTD will not require an agent for core functionality. Agent can be used for visibility.
- Solution will protect against iOS sideload apps (BYOD + MDM)
- Solution will employ Android Malware scanning
- Solution will employ UEM App Store Android/APK malware scanning
- Solution will employ phishing prevention/malicious URL attacks
- Solution will employ Offline protection (Android/iOS)
- Solution will conduct IOS APP integrity checking (Dynamics SDK apps)
- Solution will protect from SMS phishing attacks (SMISHING)
- UEM unified console will have integrated dashboard reporting
